Attn: Dave

Dear Preferred Guden Customer,

As you are probably already aware, Europe has issued a directive on the Restriction of Hazardous Substances (RoHS). Essentially, certain electrical and electronic equipment must be free of various hazardous materials so it does not produce an environmental problem upon disposal. This covers all component parts, including Guden hinges, handles, gas springs and other hardware.

The H.A. Guden Co., Inc. declares that all Guden standard stock items comply with the RoHS directives with the following exceptions:

-MS20253-P series military pins for cadmium content in the plating. This includes all MS20001 and MS20257-P style hinges that are assembled with this pin series.

If you require additional information or documentation concerning the compliance of Guden products please do not hesitate to contact me.

Cordially,

Customer Service Representative
