FAX 870-453-8676

Dear Sirs,

Micro Plastics Inc. uses Dupont nylon products to manufacture the molded fasteners offered in our catalog.

Attached is a letter from Dupont stating their position on PBB's / PBDE's and heavy metals in the Zytel nylon materials.

Micro Plastics Inc. does not add PBB's (polybrominated biphenyl) and PBDE's (polybrominated diphenyl ether) including penta-bromodiphenyl ether and octa-bromodiphenyl ether , nor do we add the heavy metals cadmium , hexavalent chromium , lead , mercury and their compounds to the molded fasteners during the production process.

Thank you,
William Redifer
Quality Manager
